Establishment Expired Status

Date Issued: Monday, June 3, 2024

Effective Monday, July 1, 2024, any establishment that does not have an active medical cannabis certificate will be moved to expired status in Accela and Metrc.

In expired status, an establishment is prohibited from engaging in any activity or making changes in METRC. To be moved back to an active status, the establishment will need to provide all the information in South Dakota law and administrative rules that is required to obtain a renewal certificate.

Any establishment wanting to avoid expired status must obtain its renewal certificate prior to the expiration date of its current certificate. To accommodate the time needed to process a renewal application, the information should be submitted well in advance of the establishment's upcoming expiration date. Submitting only a portion of the necessary information for renewal applications is not sufficient to avoid being placed in expired status.

Establishments in closed status must start the process over and complete a new initial application.

Regards,

Emily J. Kerr | Medical Cannabis Program Administrator
